Project Title: Travel Planner

1. Introduction

- A brief introduction to your website idea. State the goals of the project.
    - Travel weather forecast planner

- The values / benefits (tangible and intangible) this application can bring to a company/organization/end user.
    - Help users plan for travel based on long-range weather forecasts

2. Expected List of Features

- A brief list of features that you expect your website to support.
    - Weather forecast based on trip destination (single or multiple days)
        - Users can add multiple destinations and get multiple forecasts
    - Sign up/Login/Logout
        - Users can add/store their trips
    - Brief summary report of chosen destination
        - List of things to do

- Brief justifications for including these features.
    - The ability to get weather forecasts of chosen trip destinations helps users plan travel better
    - Having the users be able to store information means they always have access to their information
    - Offers users knowledge about their destinations, as well as things they might enjoy doing

3. Market Survey

- Do a survey of the web to find about five websites similar to yours.
    - https://weatherplanner.com/weather/index.php#plannow
    - https://qa.weatherplanner.com/widget/AAA/
    - https://morecast.com/en/plan-your-route

- Briefly compare/contrast the features of these websites with your idea.
  - Compare
    - Offer weather forecast for travel purposes
  - Contrast
    - Most only have forecasts for travel in the US. My website for global travel/forecasts
    - No way to store data/traps
